Math 222 - Analytic Geometry and Calculus 3
Summer 2008

Course coordinator: Peter Nguyen
Office room: Cardwell 123
Office phone: (785)532-0597
E-mail: pqhn@math.ksu.edu

Classroom procedures: Each class will consist of two parts, with a break in between. The first part of class will be lecture, usually for 1 – 1.5 hours. The second part of class will be spent going over homework problems, either as a group or individually, according to the demand.

Grading: Grades will be based out of a total of 500 points. These points are distributed as follows:

Homework: (200 points) Homework problems will be due each Monday by 5:00PM\(^1\). Only the problems from the material covered in the previous week will be collected. Only a select number of problems will actually be graded from the homework. Each selected problem will be graded out of three points. The final score for homework will be scaled to 200 points.

Midterm Exam: (100 points) The midterm exam will be held in class on Thursday, July 3. It will test all of the material covered through July 2.

Final Exam: (200 points) The final exam will be held in class on Friday, August 1. It will be comprehensive. A special place is reserved for the final. To be exact, the score obtained on the final will replace any previous lower score (appropriately scaled, of course).

Missed work: There will be no alternate or make-up homework or examinations. Any work, except the final exam, that is late or missed, for a university excused reason, will not be counted towards your grade. Otherwise, late or missed work will be recorded as a zero.

The final exam is required for completion of this course. Should you miss the final exam, it may be possible to receive an incomplete for the course. These situations will be handled by the instructor on an individual basis.

Academic honesty: Academic dishonesty will not be tolerated in this course. For more information, visit this site:

http://www.k-state.edu/honor/

Disabilities: Certain students may need special accommodations due to a disability. For more information, visit this site:

http://www.k-state.edu/dss/

\(^1\)The homework for the last week of class will be due Wednesday, July 30 at 5:00PM.
