HOMEWORK FORMAT GUIDE  
MATHEMATICS 320  

MICHAEL B. SCOTT

Homework will be assigned most weeks. Your homework solutions must be written in the specified format given below. You are encouraged to work with your classmates and ask questions about the homework during office hours or on the class message board. However, you must write up your results independently. The score on each homework will be recorded as a percentage of the possible points. No late homework assignments will be accepted. The two lowest homework scores will be dropped.

Homework Solution Format.

• Your name must appear on each page of the assignment.
• The problem set sheet must be stapled to the front of your assignment in the top left hand corner.
• You may only write on one side of a sheet of paper.
• Each page of your assignment may contain only a single problem solution. However, a single solution may take up more than single page.
• Your solutions should be written out neatly in complete sentences as much as possible. A fellow Math 320 student should be able to understand how to solve the problem by reading your solution; it is not enough to just give the answer. It is suggested that you scratch out a rough draft of your solution and write out the final solution after you have completely figured it out.
• Any diagrams or pictures in your solution should be drawn carefully and be clearly labeled.
